

LOMESH YADAV

Frontend Engineer | Angular & React

Indore, India | +91-9340757610 | lomeshyadav101@gmail.com | thegm10.com

PROFESSIONAL SUMMARY

Frontend Engineer with 3+ years building scalable web applications, primarily in Angular with growing hands-on experience in React. Delivered features across a product-based ITSM platform and a client HRMS system, covering component architecture, state management, and API integration. Comfortable using AI-assisted tools like Cursor to move faster without cutting corners on code quality.

TECHNICAL SKILLS

Frontend: Angular, Micro Frontend Architecture (Module Federation), RxJS, NgRx, React (Hooks, Component-based UI), JavaScript, TypeScript

Integration: REST APIs, GraphQL, Firebase Authentication

UI Libraries: Angular Material, PrimeNG, Chart.js

Tools & Practices: Git, GitLab, Jira, Agile/Scrum, Performance Optimization, Responsive Design

AI-Assisted Development: Cursor (used for faster iteration, refactoring, and debugging)

PROFESSIONAL EXPERIENCE

Frontend Engineer | VisionWaves

Feb 2026 - Present

- Build and maintain ITSM (product-based application) modules for service and workflow management.
- Contribute to HRMS, a client project covering employee and payroll modules.
- Built reusable Angular components, reducing duplicate code and speeding up new feature development.
- Worked on splitting ITSM modules into Angular micro frontends to enable independent builds and deployments across teams.
- Prototyped select UI pieces in React to compare component patterns with Angular for upcoming migrations.
- Use Cursor to speed up repetitive coding tasks, freeing up time for logic and edge-case handling.
- Integrated REST APIs and improved page load performance and responsiveness.

UI Developer | Productiva IT Solutions

May 2025 - Jul 2025

- Developed Angular features and improved UI responsiveness across multiple modules.
- Used RxJS to manage async data flows and state updates.
- Integrated third-party APIs to power data-driven UI functionality.

Software Developer | Ideal IT Techno Pvt. Ltd.

Mar 2022 - Mar 2025

- Built and maintained Angular applications using a modular, component-based architecture.
- Developed dashboards and data visualizations using Chart.js.
- Debugged and resolved production issues, improving stability of existing features.

PROJECTS

The GM10 - thegm10.com

- Built a dashboard-driven UI with chart-based data visualization; explored React for component-level prototyping.
- Improved video loading performance and overall UI responsiveness.

Live Traders - livetradersonline.com

- Developed authentication-based UI flows.
- Integrated the YouTube API and Firebase Authentication.

FVRD TV - fvrdtv.com

- Created responsive UI components.
- Integrated GraphQL APIs for dynamic data rendering.

EDUCATION

B.Tech in Computer Science - RGPV, Bhopal (2021)
